INGLES- FORMACIÓN

MATERIALES DE APOYO CUESTIONARIO (CR)

MÓDULO DE INGLÉS

Este módulo evalúa la competencia para comunicarse efectivamente en inglés. Esta competencia, alineada con el Marco Común Europeo, permite clasificar a los examinados en cuatro niveles de desempeño A1, A2, B1, B2.

NIVEL A1

- El estudiante es capaz de comprender y utilizar expresiones cotidianas de uso muy frecuente, así como frases sencillas destinadas a satisfacer necesidades de tipo inmediato.
- Puede presentarse él mismo y ante otros, pedir y dar información personal básica sobre su domicilio, sus pertenencias y las personas que conoce.
- Puede relacionarse de forma elemental siempre que su interlocutor hable despacio y con claridad y esté dispuesto a cooperar.

NIVEL A2

- El estudiante es capaz de comprender frases y expresiones de uso frecuente relacionadas con áreas de experiencia especialmente relevantes (información básica sobre él mismo y su familia, compras, lugares de interés, ocupaciones, etc.).
- Sabe comunicarse a la hora de llevar a cabo tareas simples y cotidianas que no requieran más que intercambios sencillos y directos de información sobre cuestiones conocidas o habituales.
- Sabe describir en términos sencillos aspectos de su pasado y su entorno, así como cuestiones relacionadas con sus necesidades inmediatas.

NIVEL B1

- El estudiante es capaz de comprender los puntos principales de textos claros y en lengua estándar, si tratan cuestiones conocidas, ya sea en situaciones de trabajo, de estudio o de ocio.
- Sabe desenvolverse en la mayoría de situaciones que pueden surgir durante un viaje por zonas donde se utiliza la lengua.
- Es capaz de producir textos sencillos y coherentes sobre temas que le son familiares o en los que tiene un interés personal.
- Puede describir experiencias, acontecimientos, deseos y aspiraciones, así como justificar brevemente sus opiniones o explicar sus planes.

NIVEL B2

- El estudiante es capaz de *entender las ideas principales de textos complejos que traten de temas concretos abstractos, incluso si son de carácter técnico*, siempre que estén dentro de su especialización.
- Puede relacionarse con hablantes nativos con un grado suficiente de fluidez y naturalidad, de modo que la comunicación se realice sin esfuerzo por ninguno de los interlocutores.
- Puede producir textos claros y detallados en torno a temas diversos, así como defender un punto de vista sobre temas generales indicando los pros y los contras de las distintas opciones.

CARACTERÍSTICAS DE LA PRUEBA

Esta prueba cuenta con 45 preguntas para ser respondidas en 1 (una) hora y se encuentran organizadas en 7 partes como se describe a continuación:

Parte 1

En esta parte, el estudiante encuentra cinco avisos y debe decidir dónde los vería. Para cada pregunta hay tres opciones A, B o C que deberá marcar en su hoja de respuestas.

Parte 2

En esta parte, el estudiante encuentra una lista de ocho palabras clasificadas de A a H. Cada una de las preguntas describe una de las ocho palabras y el estudiante debe buscar la relación entre las dos y marcar la letra correcta (A a H) en su hoja de respuestas. Hay más palabras (A a H) de las que el estudiante necesita.

Parte 3

En esta parte, el estudiante encuentra cinco conversaciones cortas. Se debe completar la conversación seleccionando la respuesta correcta de las tres opciones A, B o C en la hoja de respuestas.

Parte 4

En esta parte, el estudiante encuentra un texto con ocho espacios, los cuales debe llenar seleccionando la palabra correcta, para cada espacio, de las tres opciones A, B o C en su hoja de respuestas.

Parte 5

En esta parte, el estudiante encuentra un texto seguido por siete preguntas, en las cuales debe seleccionar la respuesta correcta entre tres opciones A, B o C en su hoja de respuestas.

Parte 6

En esta parte, el estudiante encuentra un texto seguido por cinco preguntas, en las cuales debe marcar A, B, C o D en su hoja de respuestas.

Parte 7

En esta parte, el estudiante encuentra un texto con diez espacios que debe llenar seleccionando la palabra correcta, para cada espacio, de las cuatro opciones A, B, C o D en su hoja de respuestas.

DENNIS FRALLEY COMPUTER ENGINEER

After I graduated as a computer engineer fifteen years ago, I became a computer teacher at a school. I loved teaching, and I still enjoy doing a few hours a week, but I found that most of the really interesting work was in industry. I accepted a permanent job in the computer industry six years later. There I saw that real problems are not in laboratories but in the places where products are made. So I moved into building computers and computers programs. Three years later, I was an expert. I continue to teach but in a different way, taking real life into the classroom.

I work about ten hours a day. I enjoy what I do so I don't have a problem with doing some work at home. I start by checking my e-mail before breakfast, do some work on the computer and then go to the office. My days are very busy – I read a lot and talk to many people. I consider that listening to others is very important. In fact, many of my ideas come to my mind when I'm doing that.

When I'm not working, I like listening to jazz and doing activities like writing this description of myself. I also find that teaching and math problems are very good for keeping my mind going.

Ejemplo:

0. Dennis started teaching when...

- A. he was a student
- B. he started his studies
- C. he finished his studies

1. How does Dennis feel about teaching today?

- A. He really likes it.
- B. He finds it boring.
- C. He misses the classroom.

2. Dennis found problems while working

- A. in laboratories.
- B. in factories.
- C. in schools.

3. Dennis's computer job

- A. made him love laboratories.
- B. changed his way of teaching.
- C. gave him some problems.

4. Dennis doesn't mind working ten hours because he

- A. is very friendly.
- B. reads a lot.
- C. likes his job

5. The first thing Dennis does in the morning is to

- A. go to the office.
- B. have breakfast.
- C. use his computer.

6. Dennis thinks that people

- A. are good listeners.
- B. talk too much.
- C. can teach him a lot.

7. When did Dennis write this text about himself?

- A. in his free time.
- B. after talking to
- C. while he was teaching people.

RESPONDA LAS PREGUNTAS DE ACUERDO CON EL SIGUIENTE TEXTO

Lea el texto y las preguntas de la siguiente parte.

En las preguntas 1 – 5, marque A, B, C o D en su hoja de respuesta.

Many people are increasingly thirsty for what is considered the healthiest, and often most expensive, water on the grocery shelf. However, instead of consuming four billion gallons of bottled water a year, we need to start thinking about what all those bottles are doing to the planet.

Water bottles, made from natural gas and petroleum, are bad for the environment because their production wastes valuable resources. The Earth Policy Institute in the US has calculated that it takes about 1.5 million barrels of oil to make the water bottles Americans use each year. And unfortunately, only about 23 percent of bottles are used again.

In fact, bottled water isn't necessary because most municipal water is so good that nobody needs to import a single bottle. Drinking eight glasses of bottled water a day could cost up to \$1,400 annually. The same amount of tap water would cost about 49 cents.

Another serious problem is that the more bottled people drink, the less political support there will be for maintaining public water supplies. Access to cheap, clean water is basic to a country's health.

Some local governments in the US have begun to fight back. Recently, San Francisco's Mayor prohibited his city's departments and agencies from buying bottled water. Likewise, a similar order has been given in Salt Lake City. The real change, though, will come when millions of people realize that they can save money and the planet, if they only stop drinking bottled water and turn on the tap.

People should be aware that the country has some of the best public water supplies in the world.

1. What is the journalist trying to do in the text?
 - A. explain why bottled water has negative effects
 - B. demonstrate that people drink too much water
 - C. prove that bottled water is safer than tap water
 - D. imply that local politicians prefer imported water
2. Why would someone read this article?
 - A. to find out why people should spend less on water
 - B. to learn why manufacturers use oil to make bottles
 - C. to understand why consuming soft drinks is expensive
 - D. to decide why is important to choose tap water
3. According to the author, bottled water is a problem because
 - A. it is difficult to destroy the bottles
 - B. production needs millions of barrels of oil
 - C. it causes considerable damages to nature
 - D. some people re-use dirty bottles

4. According to the author, what may happen if people drink more tap water?

- A. Local governments will save money on imports
- B. Community water programs may not be cut
- C. The country will have safer and cheaper bottled water
- D. Less money will be spent on healthcare

5. Which is the most suitable headline for the article?

- A. Bottled Water, Please
- B. In Praise of Tap Water
- C. Save Water at Home
- D. Recycle Water Locally
